The setting and characters seemed intriguing, and the book blurb intrigued me too. Unnatural Causes tells the story of a lady who's been killed and then her husband suspected of the crime, despite there being no evidence to support it. The story opens with some seedy looking characters who, at first, have no apparent motive or connection to the murder. The murder takes place in their home, and soon afterwards, it becomes apparent that the couple were under threat of violence and could have been killed even before the murder. Is there a way to prove that they're innocent? A mystery writer, Joe King has been holidaying in the Caribbean when his wife is found murdered at their home. His children are taken away by social services and he's arrested as a person of interest, even though he has a solid alibi and no motive to kill his wife. Not only that, but the police don't really believe he's guilty. However, with the help of the family's solicitor, he finds himself at the centre of a double-killing and a conspiracy, all involving a man called Samuel Carver who

AVS Firewall is a specialized third-party security software solution that enables users to control the access to and from their computer while also helping them to get rid of various banners and pop-up elements while browsing the Internet or using applications that have embedded advertisements in their interface. The application provides users with all the components they need to secure, protect, create profiles and rules, monitor their connections, view the history of connections or attempted connections and adjust the security level depending on the user's needs. AVS Firewall enables users to protect their computer against various unauthorized access attempts such as hacker attacks or severe malware threats. As mentioned above, users can adjust the app's security level to their needs in order to be more or less restrictive with their computers or connections, protecting it from malware effectively. Rules can be defined individually for each application and users can specify precisely which connection should be used and when. The firewall enables the end users to control their external and internal traffic as well and provides them with notifications every time an event occurs. Programs that try to connect to the Internet from the computer this app is installed on are detected automatically and notifies the users about the attempts. Logs that keep the history of all the attempted connections can be accessed, as well.I have followed you and your fine blog for a while now and I have finally made the commitment to start my own blog (its a whole year now!) but it has been a good year full of changes for me. I have started meditating and it has totally changed my life. I joined a co-edist group (I'm a nerd) and we all have a special connection within us (I'm a nerd!) and we all are learning together (we all have our nerd moments) to me it's the best thing I've ever done. Since my birthday is in November I decided I would go ahead and start my blog for my birthday and it's now and I have been a little nervous about the posts I've made and I've been afraid of all the things I've written about on my blog and I've been super nervous about my blog name and I thought I would share with you. I'm a nerd. I'm a geek. I'm obsessed with everything DC comics, Star Wars, Harry Potter, Etc and I guess you can say that I'm a nerd. DC Comics Star Wars I have posted a lot about Star Wars, it's probably the biggest influence on my life so far. Harry Potter In order of love: 1. Winnie the Pooh 2. Pokemon 3. My Blog 4. Puppies 5. People 6. Death Note
